1. WEATHERING

I was a rough stone
Couldn't make out my shape
Then came the weather
It's coming at me there's no escape
Take to my shelter
Have to sit here and wait and wait and wait

Weathering weathering weathering weathering

I'm just a shadow of my former self
With all of the pressure
Had to find a way to keep going
A tree on a hill
Where the wind always blows
Find it hard to keep growing

All that exposure
Letting go and resist
Is that a hurricane brewing?
But it passes along and all comes to rest
Now the storm winds are going

Weathering weathering weathering weathering

I stand on the headland facing into the wind
It's all coming at me, it's all coming at me
Some days are still others a force too strong
All that exposure
Letting go and resist
Wearing me down wearing me down
Until nothing remaining

Weathering weathering weathering weathering

All coming at me it's all coming at me
Letting go and resist

2. I NEED REMINDING

Here's where we're playing
Let's turn this thing around
Spinning that 78 or 45
You can keep your head up in the sky

I just need to hear it yes I need reminding
I just need to hear it yes I need reminding

If everybody's losing
Lost their concentration
Take you fast forward through time
Let's see what happens to you

I just need to hear it yes I need reminding
I just need to hear it yes I need reminding
I just need to hear it yes I need reminding
I just need to hear it yes I need reminding

Soothe your agitation
Well maybe it's a short time solution
Feel disorientation
Which signpost should I play for you?
Come back whenever you want whenever you want
This is how it gets to you gets to you

I just need to hear it yes I need reminding
I just need to hear it yes I need reminding
I just need to hear it yes I need reminding
I just need to hear it yes I need reminding

I know you need my help right now
'Cos you're stuck in a loop
Does it sound familiar now?
You can come back any time you want
It will always be the same
No limit to returning

I just need to hear it yes I need reminding
I just need to hear it yes I need reminding

Which landmark should I play for you
On my special radio station?
Sound it's always moving
Sometimes stuck in a loop

I just need to hear it yes I need reminding
I just need to hear it yes I need reminding

3. MY GOAL TODAY

Talking to you then
Say goodbye to them all
I have got to go now have another call

Voices coming through

Make me do what they do
Anything you say will be my goal today

What's a guy to do in this situation?

This is my goal today
Follow the instruction
Gotta do what they say
Feel a strong compulsion

Not a lot on my mind
Got no time for wasting
Not a lot I can do not a lot I can do

This is my goal today
Follow the instruction
Gotta do what they say
Feel a strong compulsion

What's a guy to do in this situation?

This is my goal today
Follow the instruction
Gotta do what they say
Feel a strong compulsion

This is my goal today
Follow the instruction
Gotta do what they say
Feel a strong compulsion

This is my goal today
Voices coming through
make me do what they do
Gotta do what they say
Anything you say will be my goal today

---

4. A MOMENT OF YOUR TIME

There are places that you have to be
There are things that you need to do
There are people who would love you
Imagine they'll be all over you

I had to justify every moment of your time
'Cause you're always dreaming there are better things to do

I believe you never used to
Be this distant ever far away
And the first time happened to you
Found out what it means to you
You were pulled in you were lured away
Always drawn to the latest places

I had to justify every moment of your time
'Cause you're always dreaming there are better things to do

They all want to know who you are
But they don't care who you really are
You were restless you were hopeful
Going anywhere to get away

I had to justify every moment of your time
'Cause you're always dreaming there are better things to do

Dooby doodoo, dooby doohoo
Lalalala lalalala
Dooby doohoo dooby doohoo
Dooby doohoo dooby doohoohoo

In the old days when you had the time
Well what happened to you what happened to you?

I had to justify every moment of your time
'Cause you're always dreaming there are better things to do

Dooby doodoo, dooby doohoo
Lalalala lalalala
Dooby doohoo dooby doohoo
Dooby doohoo dooby doohoohoo

---

5. EVERY LITTLE THING THAT HAPPENS IN THE WORLD

Somebody spoke boy I heard it
Heading my way can't avert it
Flap your wings and sure I feel it
Any old thing that I can sense

Move over stand up sit down or maybe just drifting off
Lost in a bookstore caught in the tube door gotta get home
Crowd roar hand clap last lap get ready get set go

Every little thing that happens in the world
Well what am I going to do about that?
Every little thing that happens in the world
I'll never get this baby to sleep tonight

Factory mechanical industrial festival of noise and light
Lorry in a quarry and a digger on a busy construction site
Gameplay workday weekend then go out at night
Fast food slow dance quick step hold stance stop and wait
Sleep wake walk run fly swim not done yet no no
Bell ring phone call that's alarm time set

Rustling breathing laughing crying
Switching clicking throwing catching dynamite
Non-stop television cinematic stimulating appetite

Every little thing that happens in the world
Well what am I going to do about that?
Every little thing that happens in the world
I'll never get this baby to sleep tonight

This moment we all go schtum
Just the breeze and a faint distant hum
Hmmmmm

Heart pumping finger clicking motor running got a meeting ten past nine
Wake up water washing coffee eating croissant think I'm cutting it fine
Listen to the audio and watching through the video explaining all
They're all afraid I might switch off

Every little thing that happens in the world
Well what am I going to do about that?
Every little thing that happens in the world
I'll never get this baby to sleep tonight

---

6. THAT PROTECTING FIELD

Follow you all around
Cameras track to watch
Where can you disappear
Protected by bodyguard minders?

Now it surrounds me
The shield it goes over
No one gets closer
A cloud hovers over
The shell of crustacean
Some kind of protection
Now it won't hurt me
You're some kind of poison

And as you now create
Events that will resonate
Patrolling the rampart wall
Wearing my armour now

Now it surrounds me
The shield it goes over
No one gets closer
A cloud hovers over
The shell of crustacean
Some kind of protection
Now it won't hurt me
You're some kind of poison

Disguised then out of sight
Camouflaged in the night

Now it surrounds me
The shield it goes over
No one gets closer
A cloud hovers over
The shell of crustacean
Some kind of protection
Now it won't hurt me
You're some kind of poison

---

7. RENDEZVOUS

Why not talk 'bout something new?
Ditch that old hackneyed view
Easy enough to generate friction
As you do with dedication
Build your self through their exclusion
No wonder that you spread confusion

It has that effect on you
Love can be your occupation
Listen as the news comes through
Changing hate to love elation

Need a map to find a way

Through all the contradicting notions
Well I hear it's good for you
Show me that its good for me too
Each in those views concur
To form a group or form a nation
Can all in this place agree
At the boiling point of separation

It has that effect on you
Love can be your occupation
Listen as the news comes through
Changing hate to love elation

Harsher when you dont know who
When thinking of a faceless stranger
One to one we got to meet
And realised we're not in danger
I'm looking for the clearest you
Without the constant obfuscation

It has that effect on you
Love can be your occupation
Listen as the news comes through
Changing hate to love elation

---

8. OBJECT MNEMONIC

I can remember everything you tell me
I have a photographic mind
Give me the words
Give me numbers I love numbers
I never forget a face
I have a photographic mind

I can remember everything you tell me
Give me the words
Give me numbers I love numbers
I never forget a face

---

9. Ms SERVICE

Sunday noon when everybody seemed to be snoozing
That's when she left just the warm tea on her desk
Did she fake her death and fly out to a James Bond island?
I tried a lot to get through with the message returning
Those nighttime ghosts maybe all in my imagination
It all just melts when the daylight hits the surface

Any luck? Has anybody seen Ms Service?
She said she'd write if she ever went away
ever went away
Latest post there's an email coming back from the server
No word no note no forwarding address no number

A string of lights suspended 'cross the calm bay harbour
In the dead of night when submarines come to dock
They combed the coast sent flares and powerboats searching
Then found her bag on the deck of a large cruise liner

Any luck? Has anybody seen Ms Service?
She said she'd write if she ever went away
Latest post there's an email coming back from the server
No word no note no forwarding address no number

It drew the stars and a whole world of speculation
They talked they guessed and they made up all the rest
Said a friend of a friend said maybe or could be not sure
A photo's up but maybe looks a little blurry

Any luck? Has anybody seen Ms Service?
She said she'd write if she ever went away
Latest post there's an email coming back from the server
No word no note no forwarding address no number

10. THEATRE OF THE HEAD

Open the curtain there's a dark stage
And tonight we'll act on that
All the players got their script
Dress in shadowy black and white

Ah ah elalaylalay

The marquee announce
Speaking to the front of house
Sitting in a balcony or box
The control room operates

Figures in black dance and change the set
And a chair becomes a table
The wall becomes a hill
Virtual sun through a high skylight

Elalaylalay ah ah

In a theatre of the head
You have the finest seat
The scene repeats the stage rotates
Turning back to front
Same story in different guises
Happenings jumbled up
Then you catch yourself
In a watchful net

Ah ah elalaylalay ah ah

11. EMERGENCE

Lying in a river looking up at a plane
Drawing my thoughts of you back again
Me and you apart are something more together
Separated at other ends of the world

If you look closer
All appears to go on and on
Standing back in the distance
Now you see nothing there at all

Smaller than atoms much bigger than your head
Finding common ground or barely a thread
Put a few things together what can they become
Placed in a future that we will to come?

If you look closer
All appears to go on and on
Standing back in the distance
Now you see nothing there at all

You can go your separate way but you'll never be apart
Always in relation like your brain to your heart
Why didn't I do it why didn't I go there?
I felt I'd give up too much for that prize illusion

If you look closer
All appears to go on and on
Standing back in the distance
Now you see nothing there at all
